Office Action Summary	Application No. 10/565,345	Applicant(s) MAIOCCHI, SERGIO A.	
	Examiner /BENTSU RO/	Art Unit 2837	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Specification and Drawings

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

2. Drawing correction is required as follows:

- Applicant should label Figs. 1, 2, 5 as "prior art" if these drawings are in fact "prior art".

3. The drawings as originally filed are informal. **A new set of formal drawings is required now.**

4. In the USPub 2007/0247091, paragraph [0002], line 1, the examiner has noted that the word "sleep" has been misprinted as "steep" and paragraph [0043] the drawing "FIG. 10E" has been misprinted as "FIG. 10B". Applicant should file a correction request to correct the same.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 47-68 and 84-86, drawn to a system for driving a direct-current motor under conditions of a controlled DC current (or the like).

Group 2, claim(s) 69-80, drawn to an air flow apparatus.

Group 3, claim(s) 81-83, drawn to a system for intermittently powering a microprocessor based system.

Group 4, claim(s) 87-92, drawn to a switching based ac to dc converter.

The inventions listed as Groups 1-4 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: In Group 1, the controlling a dc motor under the condition of a controlled dc current (or the like) is different from Group 2 an air flow apparatus because the air flow apparatus does not necessarily require a dc motor under a specific condition of Group 1.

Similarly, Group 3 relates to a power supply system and Group 4 relates to a converter. The power supply system of Group 3 and the converter of Group 4 are totally different from the driving of a dc motor of Group 1 or the air flow apparatus of Group 2.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
